BSI Updates List

BSI Updates

The BSI distribution list bsi-updates is used to send notifications about new content on BSI and significant revisions to existing content. Follow these instructions to subscribe or unsubscribe from the list.

Subscribing

To subscribe to the list, address an email in plain text format to **majordomo@cert.org**. In the body of the e-mail, type **subscribe bsi-updates**. You can leave the subject blank.

After you send the email, you will receive an automated email response asking you to confirm your subscription. This request includes a code in the subject header that should be retained in your reply. Type only the word **accept** in the body of the message. (There are other possibilities described in the confirmation request.) Remove any additional text from the body of the message, including a signature line. If your email client automatically adds a signature when you send messages, disable this feature or type **end** at the bottom of your message.

After you send the confirmation email, you will receive another automated email response welcoming you to the list and providing details on unsubscribing, along with some commands applicable to Majordomo mailing lists. It is recommended that you keep this message for future reference.

Unsubscribing

To unsubscribe to the list, address an email in plain text format to **majordomo@cert.org**. In the body of the e-mail, type **unsubscribe bsi-updates**. You can leave the subject blank. Remove any additional text from the body of the message, including a signature line. If your email client automatically adds a signature when you send messages, disable this feature or type **end** at the bottom of your message.

After you send the email, you will receive an automated email response asking you to confirm the change. This request includes a code in the subject header that should be retained in your reply. Type only the word **accept** in the body of the message. You will receive an automated email response letting you know that your unsubscribe request has been successful.
